PROFESSIONAL SUMMARY

Technology professional who bridges engineering and business, with 30+ projects delivered and 25+ of them developed hands-on. I build React, PHP and Python products, coordinate AI/ML delivery workstreams, and lead client-facing implementations such as a national Moodle e-learning LMS for a government client, owning requirement gathering, SRS drafting, development, UAT, go-live and hypercare.

CORE COMPETENCIES

- React, JavaScript, PHP, Python, MySQL, REST APIs
- Moodle LMS: setup, themes and plugin development
- End-to-end SDLC: requirements, SRS, UAT, go-live, hypercare
- Scope, schedule, risk and quality management
- Client and stakeholder management
- Technical SEO, GA4 and Google Tag Manager
- API testing and validation with Postman
- Hosting, cPanel and AWS deployments

PROFESSIONAL EXPERIENCE

Project Coordinator

Nov 2025 – Present

BIG Language Solutions · Noida, India

- Track project data, issues and timelines across multiple concurrent AI/ML data and evaluation workstreams.
- Own quality tracking for data-labelling and evaluation deliverables and report findings to stakeholders.
- Coordinate API-level validation (Postman) with engineering to reduce research-to-production handoff risk.

Technical Project Coordinator (Contract)

Mar 2025 – Nov 2025

MRCC Group · Noida, India

- Delivered a national Moodle e-learning LMS for a government client end to end: requirement gathering, SRS drafting, development, UAT and go-live.
- Drove Moodle theme customisation and plugin development for client LMS engagements.
- Built and tracked schedules and scope plans for Moodle LMS implementation and plugin development.
- Monitored quality and performance metrics with Google Analytics and Tag Manager, reporting variances to leadership.
- Primary point of contact between client stakeholders and engineering, managing risk and expectations.

Junior Software Developer

Mar 2024 – Feb 2025

Bcloud Web Services Pvt. Ltd. · Noida, India

- Backend development in Python, PHP and MySQL, plus API integration.
- Wrote SQL for data handling and coordinated with the team to hit delivery timelines and quality expectations.

Program Manager

Jan 2023 – Mar 2024

Kinetic Sage Technologies · Mathura, India

- Managed end-to-end program execution across cross-functional teams and stakeholders.
- Delivered client builds including the YFP Bikaneri e-commerce store and a real-estate property CRM.
- Tracked progress and issues, escalating and resolving risks to keep deliverables on track.

SELECTED PROJECTS

- **YFP Bikaneri** (E-commerce, yfpbikaneri.com): An online store for traditional Indian sweets and namkeen, with category browsing, combos and festive collections.
- **MaxLift UAE** (Business website · Catalogue, maxliftuae.com): A product catalogue site for a lifting and material-handling equipment supplier serving construction, marine, offshore and industrial clients across the UAE.
- **DataBridge CRM** (SaaS · CRM / ERP, databridgecrm.com): Product site for an all-in-one SaaS that combines industry-specific CRM and ERP suites with marketing and AI tools.

EDUCATION

- **B.Tech, Computer Science Engineering**, GL Bajaj Group of Institutions (2021 – 2025)
- **Senior Secondary (XII), PCM**, Kendriya Vidyalaya (2020 – 2021)

CERTIFICATIONS & ACHIEVEMENTS

- Supervised Machine Learning: Regression and Classification (Issued Mar 2026)
- MongoDB for SQL Experts (MongoDB · Jun 2024)
- Data Science Master Program (Python data analysis & predictive modelling)
- Winner, IEEE PES Day Innovation Ideation 2024 (Award)
